

About MFK 2013 Mission

MFK raised almost \$5,000 last year (2012) and Yuliya went to Russia summer and bought 12 sets of TIVAS (totally implantable vascular access device) for chemotherapy. Those devices by *BBraun* (a US based medical device manufacturer - please see below *BBraun TIVAS* specification) will be used for oncology patients who being treated at the Kaliningrad Regional Hospital. The Hospital's doctors asked us to purchase more TIVAS next year, if possible. Also , MFK has launched another initiative in the City of Kaliningrad (forming a cancer support group for all types of cancer including cancer patients, caregivers and family members). MFK 2013 fundraiser objective is to raise more funds to support the above-noted goals. **Your free will donations will be greatly appreciated.** At the party, you will also be offered to view some pictures from my 2013 missionary trip. Also, you can click on the link ***MFK Summer 2013 Report Show*** and view the slide show on our website.
